

NSW Telco Authority

Digital platforms for critical communications

Craig Parnham

Executive Director, Digital, Technology and Innovation

About us

Connectivity leader

Lead strategy to guide investment, policy and priorities, and align all-of-government initiatives

Public Safety Network

Operate and maintain the Public Safety Network for emergency and essential services and government agencies

Telecommunications and emergency management

Coordinate response and protect telecommunications infrastructure during emergencies

Program delivery

Deliver major telecommunications and digital infrastructure

Customer centricity

What is a platform?

Uber

A ride-hailing, food delivery, and logistics service

Connects drivers with riders or consumers

Amazon

A global online marketplace for a wide variety of goods

Connects retailers with consumers

Apple app store

A storefront to discover and download apps

Connects app developers with users

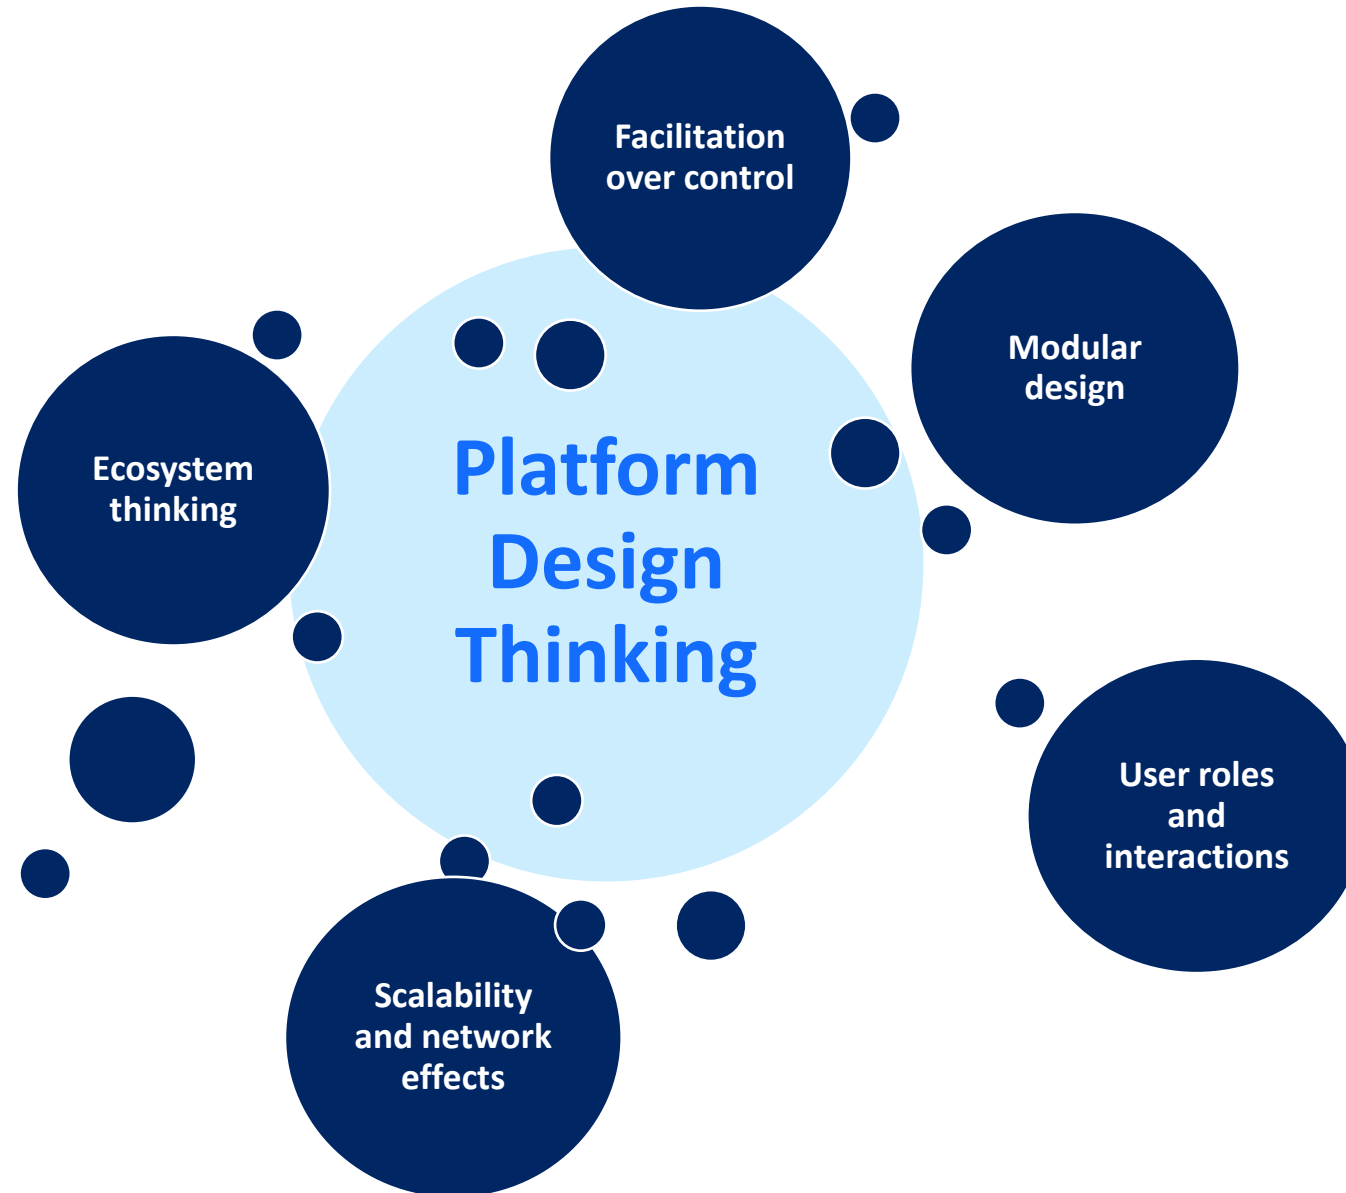

Fuel Check

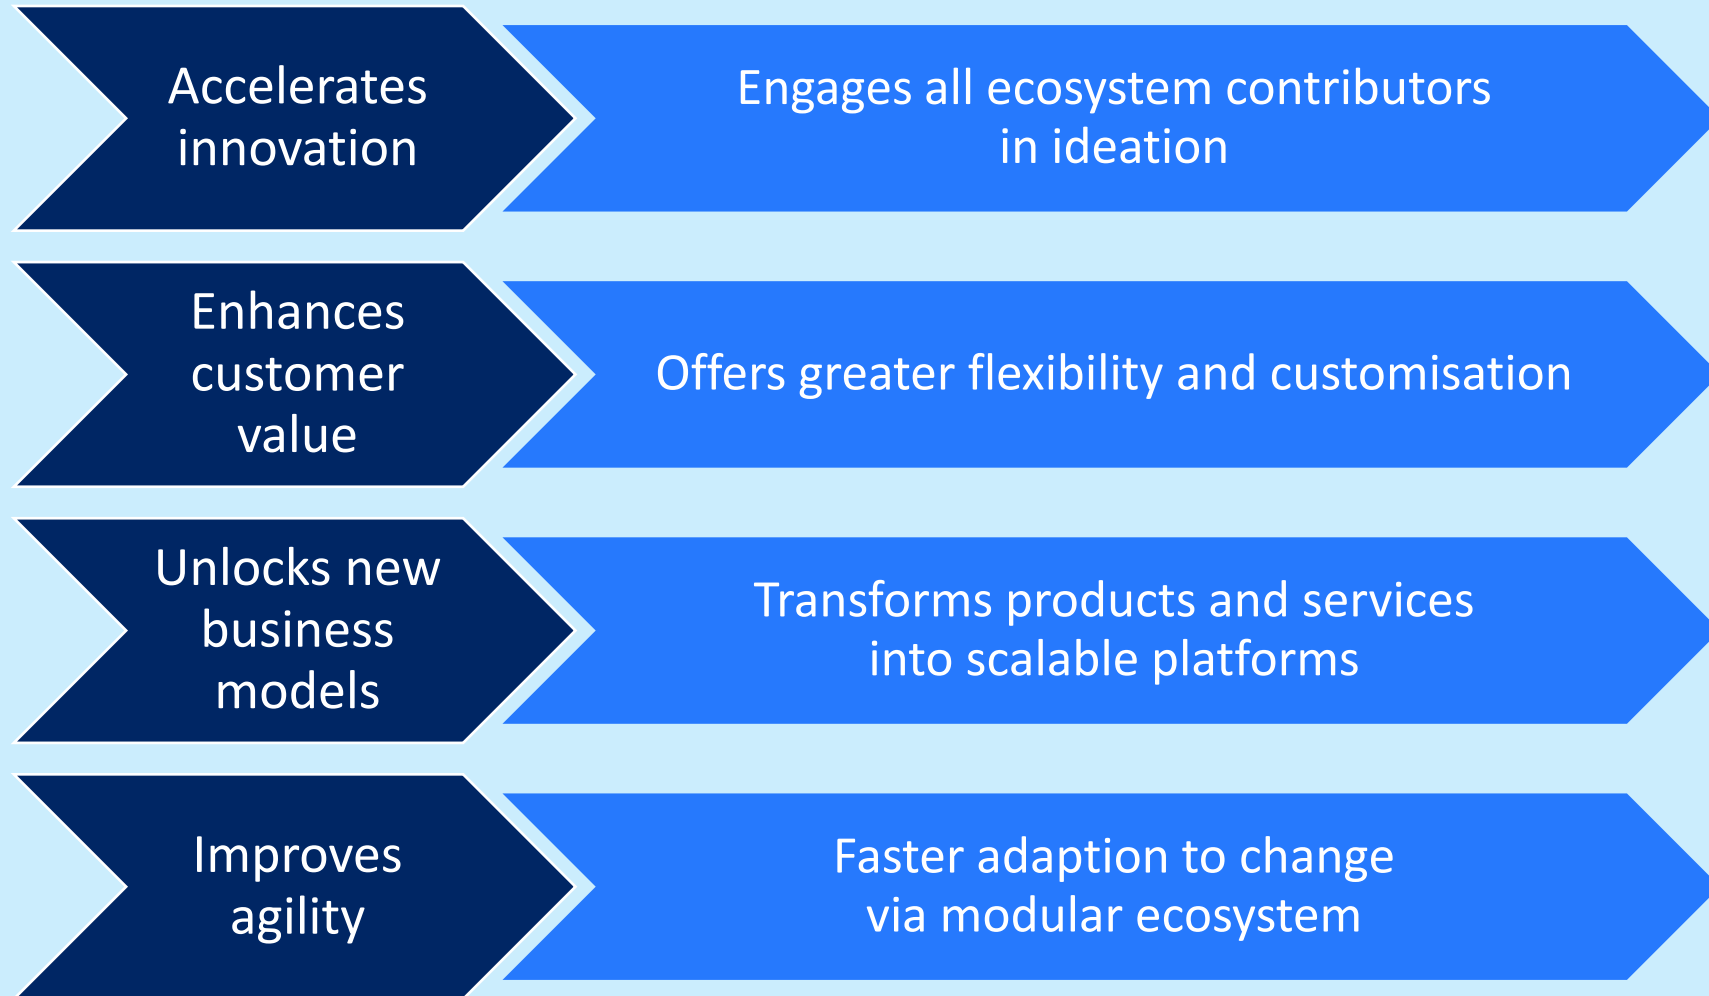

Real-time information about fuel prices

Connects service station operators with drivers

Principles

Benefits

Our role as aggregator

Coordinate and
synchronise
efforts

Validate most
suitable
technologies

Ensure solutions
will be
interoperable

Maintain
consistency of
approach

Inform
recommendations
for NSW
Government
investment

Driving value for all

Ecosystem thinking

Make solutions more accessible

Modular design

Establish open environments for reliable solutions and compliant devices

Network effects

Drive adoption and usage with interoperable solutions

Scalability

Access and deploy solutions more affordably

Platform Design Thinking
